Office Action Summary	Application No. 10/710,023	Applicant(s) LAMARRE, PHILIP A.	
	Examiner Kathleen Duda	Art Unit 1756	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-20 are pending in this application. Claims 9-20 have been allowed as indicated in the previous office action.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Kaule (US 2006/0141385) or Borodovsky (US 2005/0074698).

Claims 1-8 recite a structure which comprises a substrate, first resist layer with a latent image, opaque barrier layer and a second resist layer with a latent image.

Kaule teaches an exposed substrate which comprises a substrate with a resist layer which is exposed and developed and a second resist layer which is exposed and developed (see claim 10). Claims 15 and 16 teach a barrier layer which can be metal between the two resist layers. Paragraph

107 teaches additional layers can be used. The patterns are taught to be variable (see figures). Paragraph 0013 teaches various photoresists can be used.

Borodovsky teaches a lithography process which produces a structure with a first developed photoresist and a second developed photoresist (claim 11). Claim 15 teaches a barrier layer between the two photoresist layers. The figures depict variable patterns. Paragraph 0050 teaches that the two resists may be chemically different.

Conclusion

4. Any inquiry concerning this communication should be directed to Examiner K. Duda at (571) 272-1383. Official FAX communications should be sent to (571) 273-8300.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff, can be reached at 571-272-1385.
